### Pros

- Operating profit margin above 25% indicates strong pricing power and cost discipline
- Net profit compounding at above 20% over 5 years creates significant shareholder value
- Earnings per share growing above 15% CAGR indicates strong earnings quality and compounding
- Revenue growing slower than profits shows improving operating leverage and scale benefits

### Cons

- Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
- Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility

Capital Allocation: Growth Funded by Debt
