Pros

- Revenue growing at above 15% CAGR over 5 years reflects strong business momentum
- Operating profit margin above 25% indicates strong pricing power and cost discipline
- Net profit compounding at above 20% over 5 years creates significant shareholder value
- Very high interest coverage ratio reflects negligible financial stress from debt servicing

Cons

- Free cash flow negative for 3 consecutive years raises concern about cash generation quality
- Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
- Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility

Capital Allocation: Growth Funded by Debt
